

TEACHING EFFECTIVENESS

As instructor of record, I have taught two sections of Applied Business Economics (BECO 3310) at Texas Tech University's Rawls College of Business: Fall 2025 (109 enrolled) and Spring 2026 (59 enrolled). The summary below reports my student evaluation of instruction scores and a selection of representative student comments. The complete evaluation reports and a sample course syllabus are appended.

Student Evaluation Summary

Ratings are on a 5-point scale (5 = Strongly Agree). Fall 2025 drew 69 responses (63% response rate) and Spring 2026 drew 15 responses (25%).

Survey Item	Fall 2025	Spring 2026
Course assignments facilitated learning	4.6	4.5
Course was well organized	4.5	4.6
I had opportunities to be successful in the course	4.8	4.7
The course helped me learn required concepts and skills	4.6	4.7
The instructor presented material in a way that helped me engage	4.6	4.5
The instructor helped me understand the relevance of the content	4.7	4.7
The instructor tailored lessons to a variety of perspectives	4.7	4.6
Overall, the instructor's teaching methods helped me learn	4.6	4.5

On every item in both terms, my ratings met or exceeded the department (ECBE), college, and university averages, which ranged from 4.4 to 4.5. Across the eight items my mean was approximately 4.6 in each term, with my highest marks on giving students opportunities to succeed (4.8 / 4.7), conveying the relevance of the material (4.7 / 4.7), and tailoring lessons to a range of perspectives (4.7 / 4.6).

There were: 109 possible respondents.

Instructor	Text Responses
	Question: Most effective learning aspects of course
	The atmosphere kept learning light and fun
	Extra credit opportunities and detailed lectures/lecture notes.
	N/A
	Professor Crego was very fun as a professor because he keeps class interesting.
	professor crego was just very easy to learn from.
	Going to class
	I enjoyed the group assignments
	Instructor Crego's ability to break down complex topics.
	The group assignments
	The most effective aspect of this class was the structure and depth of covering.
	It was great to have feedback from the students during lecture.
	All of it
	I enjoyed not having to come to class everyday. I also liked the assignments being open ended.

	The most effective parts of the course in my opinion were the problem sets and quizzes because they required you to not only look at the information, but to comprehend it to do well.
	It is great how he ties the material from the book to the lectures
	Blue books were great
	The way he teaches things
	professor was a genius
	The most effective aspect was the professors examples within the lectures for a better understanding.
	The most effective would be the in class assignments as they made me apply the concepts.
	The pace of the class was perfect.
	The group problem sets
	The power points and lectures.
	Group assignments helped almost 10x compared to if we had to do it all alone. No homework also allowed me personally to actually want to learn the material. I personally felt like there was not any busy work and it all felt meaningful and helped progress my learning.
	The most effective aspects was the way of doing problem set in class.
	The most effective aspects of the course were allowing students to collaborate and do problem sets to put what we learned to the test.
	The most effective part of the course was that it was almost completely front loaded. Having that time for me to study for my accounting classes was very beneficial for me.
	I really liked these "problem sets" that we did in this class. They really helped study for the exam, not only by showing the types of questions but also how to answer them.
	The way the lectures included examples that made the content easier to understand
	The problem sets
	The professor was helpful and aware of our needs as students. He gave work only in class and did not add to our limited time outside of class.
	When we had review days before the exams.
	tests in class
	Blue Book assignments helped prepare me for tests
	The problem sets
	Most effective aspects were the lectures and how they were divided up, as well as the exams. Not just focusing on how much information I retained (multiple choice) but rather putting what I know into my own words and give my personal opinions.
	The Inclass assignments on fridays because it helped me gain a better understanding and summarize what we had been learning.
	Having open ended questions definitely helps you learn the material. I did not like it but definitely forces you to learn the material.
	That application of economics to real life examples is very effective in order eto apply to the real world.
	the Lectures were insightful and educational

	Just coming to class and paying attention. It was fast paced but if you took notes you were fine.
	Friday assignments.
	Problem sets
	The notes are detailed
	N/A
	The problem sets were the most effective because it helped me apply what I was learning to real-world problems in a group setting.
	Group activities
	Lectures with relatable examples
	I appreciated that the problem sets were done as group work because talking things out with my peers really helped me understand the material.
	He explained everything pretty thoroughly during his lectures which made it decently easy to understand.
	the lecturing was entertaining and the professor did a great job.
	attending class
	I think the Problem Sets were the most helpful and honestly just the lectures in general.
	Going through slides on the projector and elaborating on the material.
	The lectures because they are so engaging and he uses real life examples to connect with the students.
	This is kind of a basic answer, but the lectures were very helpful for learning in this course. Crego was a good lecturer, and he used examples in class that made sense and helped make the concepts more real in my head.
	The course was very informative and the teacher made it easy to relate to with excellent real world examples.
	Question: Least effective learning aspects of course
	Not having Canvas set up at all was a serious set back. Also having zero homework assignments did not help
	Not enough examples of problems which made it a little difficult to prepare for exams.
	N/A
	n/a
	I cant really think of least effective things, I think the material was well executed
	not going to class
	Possible to much lecture... not completely bad but I learn the most when class is very interactive... This course was interactive but could be more interactive.
	The amount of materials given.
	Not really anything
	I think the lack of communication on grading could be improved.
	Really none.
	I would say everything was effective minus the class being at 8 am

	I dont think asking the class about material we don't know is very productive.
	I would say the lest effective part of the course would be when the lectures include word for word slides from the textbook because it would help to hear information worded differently.
	Some of the lectures
	N/A
	nothing
	Least effective aspect was the lack of extra assignments to get a better grasp and confirmation of understanding of the material.
	The least effective were the slide shows due to it being very bland and non interactive.
	N/A
	Non enforced attendance
	The book.
	Reading from the slideshow directly was difficult to stay focused on to.
	Everything was effective
	One of the least effective aspects of the course was having heavy lectures and not much direction as to what was going to be on the exams.
	The encouraged reading, I think, there should have been more direct statements on which chapters to read
	I don't love that attendance wasn't mandatory.
	The lectures were very hard to retain sometimes
	It was completely based on lectures and had no group work or much interaction.
	The fact that no grades were ever put into canvas
	cant see your grade the whole time
	NA
	None
	I would say this course was great overall
	I have no idea
	The number of assignments. There were very few assignments so if you do bad on one, it is difficult to recover.
	I believe doing the same thing every day could be a slight hinderence.
	Nothing I learned just fine
	Everything was effective.
	I feel that there is a much more efficient way to give assignments for the professor and students than by using bluebooks.
	There is not enough math
	N/A

	Everything felt like it was effective in a positive way.
	Open ended exams
	The lack of material on canvas
	I wish the lectures were slowed down a bit because I often struggled to keep up with note taking.
	Very few assignments to really measure if i knew the content for the exam. Studying for the exam was very very broad and super hard to figure out what would actually be on the test even after attending the reviews.
	NA
	n/a
	I think the least effective aspect of this course was the fact that there was nothing posted in Canvas. We weren't able to see any of the lectures other than in class, which wasn't helpful at all.
	No homework assignments, just quizzes and tests.
	None
	I can't think of anything. There really wasn't that much to the class; it was just lectures, problem sets, and exams, and I think they were all good for learning and understanding the material.
	None
	Question: Additional comments about instructor
Crego	While being very knowledgeable on the subject and having an upbeat demeanor in class, it did not make up for some of the shortcomings. Not being able to set up Canvas properly for the entirety of the course was frustrating. Only having one problem set to get ready for exams was insufficient and having no outside work limited learning opportunities. Overall Professor Crego is not a bad, but compared to many other professors at Tech he was certainly one of the more seemingly novice instructors.
Crego	N/A
Crego	one of the best instructor I have had
Crego	He is legit.
Crego	Continue to engage with the student's I think that great for learning.
Crego	Great Professor !
Crego	Great professor
Crego	goat
Crego	N/A
Crego	Course was engaging and interesting.
Crego	Very good teacher, considering he was just a TA to start. He is well educated and smart, and he is also willing to explain further to help students learn if they are willing to ask and participate.
Crego	The instructor felt very passionate about his role and I feel like it lead to having a great time in class. He was very clear and direct with everything and overall made me feel like the material was going to be important

Crego	He was my favorite instructor during this semester and I want to say thank you to him for everything.
Crego	Overall, a good professor who wants students to succeed in his course.
Crego	The laid back nature of the class and the fact that it was frontloaded made this class ideal for me.
Crego	He goes fast but I like the class.
Crego	great teacher
Crego	He was a good instructor and fun to hear from.
Crego	na
Crego	I loved Professor Crego's realistic and funny approach to business applied economics. He did really well keeping the class engaged. Even at 8 a.m. He made the material interesting and gave plenty of opportunities to pass. I would take him again if I could
Crego	I really enjoyed this class, by far my best economics class.
Crego	Thank you for a great semester.
Crego	N/a
Crego	n/a
Crego	I wish our professor had used Canvas more. We as students should be able to view our grades and past lecture slides whenever we want, rather than having to email our professor when we want to see them.
Crego	Professor Crego was a very kind and funny instructor. Although I had his 8 a.m. course, he always came with energy and a smile. You can tell he really enjoys his course.
Crego	None
Crego	I really liked Crego's way of teaching. He was very straight forward when discussing the material and then would give an example that made it make more sense. He was also funny, which I liked.
Crego	He was an excellent instructor and made the class fun and engaging. The real world examples were very relatable and gave incite into the world of applied economics in society today.

Text Responses

Question: Most effective learning aspects of course

Professor Crego's lectures.

N/A

Hands on teaching style

The assignments and exams were very directly correlated with what we were learning in class. Was very easy to understand what we were going over.

problem sets

i enjoyed the exam grading

The lectures and problem sets that help connect with real world problems.

The slides

interactive problem-solving sessions

The reviews

The professor truly knows the material, so he teaches and explains in many different ways to make sense.

The ability to collaborate on problem sets is helpful and makes it less stressful. The extra credit opportunities are very nice and provide a lot of help. I greatly appreciate Mr. Crego's policy on dropping one problem set and one exam; that is incredibly kind, and I hope it continues for his future classes.

Question: Least effective learning aspects of course
N/A
N/A
Lecture Slides were sparse, not great for reviewing
The lectures were a little repetitive but overall it was an effectively taught course.
n/a
N/A
In class examples
enhanced learning outcomes
This class was at 8am, even tho i really enjoyed it pls dont keep it so early. A 9am class wouldve been way more productive for me than a 8am as im just tryna survive and get through it. I was only going for attendance and working on learning the concepts seperately. Pls dont schedule it so early!
waking up at 7am
It was all effective.
My specific course was at 8am, and I found it a bit unfair to punish students for being a little late to class or having to miss it entirely. At different points in the semester we had attendance quizzes or had to write our names down, and if someone came a minute after that, they lost the chance to write down their name. I feel a student's performance should be marked by their ability on exams, and yes, attendance is important, but with an 8am course that is largely a business elective for the majority of the class, I believe we as students have earned some leeway. One solution could be requiring students to attend a minimum of classes, like, for example, 20/30 in the whole semester, and they can earn full attendance credit. The course content can feel a bit dull when just being read off slides.
Question: Additional comments about instructor
Professor Crego was very engaging with the way he taught his class.
Awesome professor, would take again & have been telling my friends to take him for BECO!
cool mustache - encourages students to purchase a ***** (goat)
He really did the best he could, sometimes funny but I would say this class has made me dislike economics more.
good teacher
I got to get to know him a little bit one day and he's really interesting and cool.
Very good professor. He cares about students, and he is understanding. Good at teaching. thorough exams and quizzes that directly correlate with what we are taught.
He was kind and his grading structure was built to help those who tried. This class is not easy in the sense that everything is open-ended and can be strictly graded, so it leaves little room for error. Despite that, I can tell he wanted to teach us and provide us the chance to learn and earn the grade we each desire. He will be a good professor for many students, and I wish him well.
